Career Experience

System Administrator II - Wipro Ltd. Data Center Services (Infocrossing) - Tempe, AZ (Jan. 2009 – Present)
Providing Infrastructure-as-a-Service (IaaS) cloud and data center services to enterprise and government clients, including architecting, planning and managing multiple global geographically dispersed, multi-site, multi-domain Active Directory migrations and domain consolidation/collapse; maintain customer DNS zones, DHCP scopes, AD Sites and Services objects and trust relationships; deploy new/replacement physical and virtual Windows Server systems; perform file share and data migrations, update HP and Dell server/blade chassis firmware; create and maintain configuration documentation; utilize and manage request, incident and change order ticket queues; provide L3 support and training to offshore resources.

Web Server Administrator - Honeywell - Tempe, AZ (Oct. 2008 – Dec. 2008)
(Contract) Subject Matter Expert within the Web Application Hosting team of Global Technology Services, supporting Internet Information Server 6/7, Apache Web Server and Tomcat Application Server on the Windows Server platform; coordinated deployments and migrations to a new corporate data center.

Active Directory Administrator - Banner Health - Phoenix, AZ (Sep. 2008 – Oct. 2008)
(Contract) Performed Active Directory and email migrations of approximately 5000 Sun Health users from a legacy Windows 2000 Professional/Lotus Notes environment to a Windows XP/Exchange 2007 VMWare VDI-based infrastructure following a corporate acquisition. Conducted a comprehensive inventory and survey of the existing data center as part of the planning for a future consolidation/relocation. Performed day-to-day Active Directory/Exchange security administration, and updated management scripts.

System Administrator - Infocrossing - Tempe, AZ (Aug. 2008 – Sep. 2008)
(Contract) Assisted in deployment of 100+ Dell PowerEdge 2950 servers for a California state agency. Duties included imaging Windows 2000/2003 servers, network connectivity configuration and troubleshooting, configuration of DRAC remote access, and deployment and troubleshooting of Altiris NS and NetBackup client agents.

Active Directory Consultant - Sogeti USA - Phoenix, AZ (Feb. 2008 – July 2008)
As a Senior Consultant in the Core Infrastructure practice, provided full implementation support for Microsoft Active Directory, Windows Server, Exchange Server and SQL Server. Projects included: 3000+-user Novell GroupWise migration to Exchange 2007 for Blue Cross/Blue Shield of Arizona; Active Directory upgrade, deployment and consolidation planning for the Tucson Unified School District.

System Administrator - Avnet Managed Technology - Chandler, AZ (Aug. 2007 – Feb. 2008)
(Contract) Responsible for integration, deployment and management of HP and IBM web and application servers with Microsoft Windows 2000/2003, SQL Server 2000/2005, IIS 5/6 and VMWare. Deployed HP SIM and IBM Director, including firmware, driver and agent updates on approximately 225 customer servers. Responsibilities included: break/fix and warranty management; server, rack, data center and compliance documentation; on-call rotation.

System Administrator - Honeywell - Tempe, AZ (Feb. 2007 – April 2007)
(Contract) Installed, configured and managed test environment infrastructure for Data Center Rationalization project consisting of IBM BladeCenter, System X, xSeries and pSeries servers, HS and LS series server blades, Cisco switches, and a NetScreen firewall, with Windows Server 2000/2003, VMWare ESX. Supported field technicians in performing P2P/P2V/V2V migrations of production servers using Racemi DynaCenter and PlateSpin PowerConvert.

System Administrator - Catholic Healthcare West - Phoenix, AZ (Dec. 2006 – Feb. 2007)
(Contract) Performed inventory and assessment of 2000+ Windows Server NT/2000/2003 and SQL Server 2000/2005 configurations; reviewed event logs and system performance; recommended and implemented specific remediation plans to enhance security and performance. Evaluated commercial and open source tools for log consolidation, filtering and incident response, as well as automated firmware, driver, OS and application patching.

Active Directory Administrator - U.S. Foodservice - Phoenix, AZ (June 2006 – Dec. 2006)
(Contract) Responsible for managing multiple migration projects from legacy regional Windows NT Server networks to a consolidated corporate Windows Server 2003 Active Directory environment; building and configuring Windows Server 2003 virtual servers; file share and data migration; workstation migration and application deployment via Altiris DS. Supported SQL Server 2000 database servers, reviewing security and maintenance plans. Performed MS Exchange Server 5.5 and Lotus Notes administration tasks.

IT Manager (Acting) - Kulicke & Soffa Industries - Gilbert, AZ (March 2006 – Jan. 2008)
(Contract) Direct responsibility for troubleshooting, maintaining and upgrading the Windows NT Server network and Veritas NetBackup system; supervising desktop support; assisted in troubleshooting and repairing Sun v480/v880 Oracle database application servers and StorEdge systems; managing telecom services and assets; and coordinating with IT Support members in the U.S., Israel, China, Malaysia and Singapore.
